EDUCATION

National Institute Of Technology, Kurukshetra
Bachelor of Technology in Computer Science

Haryana
Aug 2023 – May 2027

EXPERIENCE

AEH Intern Jun. 2026 – Jul. 2026
Accenture *Mumbai*

- Built custom AI Agents for real-world client problems in a hyper-agile delivery.
- Gained hands-on enterprise exposure to Microsoft Azure, AWS (Bedrock), and Google Cloud platforms.

Software Intern - Backend Jun. 2025 – Aug. 2025
Lepton Software *Gurugram*

- Built a Python/LangGraph multi-agent backend orchestrating SQL and API integrations for conversational data analysis.
- Developed a Dockerized Elasticsearch backend powering high-speed similarity search and automated geocoding at scale.

PROJECTS

LegacyGraph-MCP Server | *Python, FastMCP, Tree-sitter, NetworkX, Smithery, Docker* March 2026

- Engineered a backend service mapping legacy C++ business logic into queryable knowledge graphs, accelerating AST ingestion 30x to index 1.15M+ nodes in under 10 minutes.
- Containerized with multi-stage Docker for hybrid stdio/HTTP deployments, scaling to reliably handle 20k+ RPC/API calls and 10k+ concurrent sessions via Smithery.

Intelligent Address Matching System | *FastAPI, Python, Gemini API, Elasticsearch, React, GitHub* July 2025

- Architected a backend pipeline in Python and Elasticsearch to process and standardize over 2 million unstructured Indian addresses for the BFSI sector.
- Optimized fuzzy matching and vector search algorithms, achieving 92% validation accuracy at a strict sub-2-second API response latency.

AI Assistant for SmartMarket.ai | *Python, LangGraph, LangSmith, FastAPI, SQL, Docker, GitHub* June 2025

- Designed an autonomous multi-agent backend using LangGraph to orchestrate multi-step business logic across distributed APIs and databases.
- Improved data accessibility and decision-making via an adaptive, agent-driven backend framework for conversational analysis.

DemystDocs.AI | *Python, FastAPI, React, Supabase, Google Cloud Platform, GitHub* Sept 2025

- Built an end-to-end document intelligence backend integrating OCR, RAG, and vector search into scalable processing workflows.
- Designed and delivered high-performance RESTful APIs on GCP for low-latency interaction with large data sets.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, SQL (Postgres), HTML/CSS

Concepts & Architecture: RESTful APIs, Microservices, Distributed Systems, Observability (Telemetry/Metrics), Graph RAG, JSON-RPC

Frameworks & Tools: FastAPI, LangGraph, FastMCP, Tree-sitter, NetworkX, LangChain, React, Pandas

Cloud & DevOps: Google Cloud Platform (GCP), Docker, Git, Postman, Elasticsearch, Supabase, HF Spaces

Coursework: Data Structures & Algorithms, Machine Learning, Object-Oriented Programming, Database Management Systems, Linear Algebra

ACHIEVEMENTS & CERTIFICATIONS

Flipkart GRiD 8.0: National Semi-Finalist among 1.65Lacks students

Goldman Sachs India Hackathon (GSIH) 2026 – CS Track: Secured AIR 159 among 16,000+ participants.

Competitive Programming: 3-Star rating (1618) on CodeChef and solved 550+ DSA problems on various platforms.

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Supervised Machine Learning: Regression and Classification
