EDUCATION

National Institute of Technology, Kurukshetra

Bachelor of Technology in Computer Science

Haryana

Aug 2023 – May 2027

EXPERIENCE

Advanced Application Engineering (AEH) Intern

Jun 2026 – Jul 2026

Accenture

Mumbai

- Created an AI agent automating RFP analysis and generating missing-information questions with nested follow-ups.
- Automated RFP analysis, replacing multi-round email exchanges with a streamlined process and saving 8+ hours per RFP cycle.

Software Intern - Backend

Jun 2025 – Aug 2025

Lepton Software

Gurugram

- Implemented a multi-agent backend that orchestrating SQL and API integrations for conversational data analysis.
- Deployed a Dockerized Elasticsearch backend powering high-speed similarity search and automated geocoding at scale.

PROJECTS

LegacyGraph-MCP Server | Python, FastMCP, Tree-sitter, NetworkX, Smithery, Docker

Mar 2026

- Engineered a backend service mapping legacy C++ business logic into queryable knowledge graphs, accelerating AST ingestion by 30× to index 1.15M+ nodes in under 10 minutes.
- Containerized with multi-stage Docker for hybrid stdio/HTTP deployments, scaling to reliably handle 20k+ RPC/API calls and 10k+ concurrent sessions via Smithery.

DemystDocs.AI | Python, FastAPI, React, Supabase, Google Cloud Platform, GitHub

Sep 2025

- Integrated OCR, RAG, and vector search into an end-to-end intelligence backend for scalable document processing
- Designed and deployed high-performance APIs on GCP, enabling low-latency interaction with large datasets.

Intelligent Address Matching System | FastAPI, Python, Gemini API, Elasticsearch, React, GitHub

Jul 2025

- Architected a backend pipeline in Python and Elasticsearch to process and standardize over 2 million unstructured Indian addresses for the BFSI sector.
- Optimized fuzzy matching and vector search algorithms, achieving 92% validation accuracy with sub-2-second API response times.

AI Assistant for SmartMarket.ai | Python, LangGraph, LangSmith, FastAPI, SQL, Docker, GitHub

Jun 2025

- Implemented an autonomous multi-agent backend using LangGraph to orchestrate multi-step business logic across distributed APIs and databases.
- Improved data accessibility and decision-making via an adaptive, agent-driven backend framework for conversational analysis.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, SQL (Postgres), HTML/CSS

Concepts & Architecture: RESTful APIs, Microservices, Distributed Systems, Observability (Telemetry/Metrics), Graph RAG, JSON-RPC

Frameworks & Tools: FastAPI, LangGraph, FastMCP, Tree-sitter, NetworkX, LangChain, React, Pandas

Cloud & DevOps: Google Cloud Platform (GCP), Docker, Git, Postman, Elasticsearch, Supabase, HF Spaces

Coursework: Data Structures & Algorithms, Machine Learning, Object-Oriented Programming, Database Management Systems, Linear Algebra

ACHIEVEMENTS & CERTIFICATIONS

Flipkart GRIID 8.0: National Semi-Finalist among 165,000+ participants

Goldman Sachs India Hackathon (GSIH) 2026 – CS Track: Secured Rank 159 among 16,000+ participants.

Competitive Programming: 3-star rating (1618) on CodeChef and solved 550+ DSA problems on various platforms.

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Supervised Machine Learning: Regression and Classification
